

**Company Name:**

The Hawkins Watts Group

Can you please introduce your company?

The Hawkins Watts Group represents many of the world's leading ingredient companies with a broad product portfolio specialising in Texture, Colour, Health & Nutrition, Flavouring, and more...

We are proud to be a family-owned business, focused on Australian and New Zealand markets. Our team of highly experienced food technologists work collaboratively, sharing knowledge and experience, to find the best solution for our customers.

Why did you choose the BRCGS Standard?

BRCGS was the best fit for our business model: Hawkins Watts is both an ingredient trader as well as a manufacturer, so having the traded goods section of the standard provides a 'one stop shop' solution for us.

What are the benefits of being BRCGS certificated?

BRCGS Certification assures our customers that Hawkins Watts has effectively implemented a world class Quality & Food Safety System. Our customers can take comfort knowing we set targets, monitor, and take action to strive for continuous improvement. Implementing BRCGS across every function of our business provides ongoing development of our food safety and quality culture.
