

**Company Name:**

Arcoplastica S.r.l.

**Can you please introduce your company?**

Arcoplastica S.r.l. is a solid Italian company located in the province of Turin which has established itself as a leader in the MOCA production sector from the end of the 60s to today.

Thanks to the technologies present and developed within its corporate perimeter, Arcoplastica is able to both extrude and thermoform plastic materials of various kinds, such as for example PET, PS, PP and PLA (also multilayer with EVOH barrier or with active barriers in single materials) ascertaining and therefore meeting the needs of individual customers and the market.

Today, Arcoplastica owns 3 extrusion lines and 20 thermoforming lines.

**Why did you choose the BRCGS Standard?**

Arcoplastica S.r.l. has chosen the BRCGS Packaging standard in order to increase its credibility towards its Customers as well as improve its control system aiming at an ever-increasing level of Food Safety of the articles produced. This Certification allows the Company to stand out on the market and allows it to satisfy the increasingly stringent requests coming from the food sector.

**What are the benefits being BRCGS certificated?**

Obtaining and maintaining the BRCGS Packaging standard has allowed Arcoplastica to increase the level of trust on the part of its customers. In addition to this, working for a Company in possession of such an important Certification generates a greater degree of satisfaction for Employees who feel responsible and part of a complex process that is not limited to production activity but to the satisfaction of external parties.

Being in possession of the BRCGS Packaging standard also allows Arcoplastica to be more competitive on the market and to transmit trust to the important brands of large-scale retail trade.
